NOTICE TO BIDDERS: Amend the Project Manuals and Drawings to the above-referenced project as follows:

A. On page 5, delete paragraph 2.2.A.3.c.2 and replace with the following:
   Product: PC 310 Treadcoat

B. On page 5, delete paragraph 2.2.A.3.c.4 and replace with the following:
   “Minimum installed thickness of resin prior to broadcast: 20mm WFT”

C. On page 5, delete paragraph 2.2.A.3.d and replace with the following:
   “Build Coat for Floors, Walls, and Ceilings”

D. On page 5, delete paragraph 2.2.A.3.d.5 and replace with the following:
   “Installed thickness 25-35mm.”

E. On page 5, delete paragraph 2.2.A.3.d.6 and replace with the following:
   “Number of coats: 1. (Note: additional coats may be required to achieve the specified thickness of 25-35mm.)”

F. On page 5, prior to 2.2.A.3.e.2, add the following paragraph:
   “Product: PC 400 Glazecoat”

G. On page 5, delete paragraph 2.2.A.3.e.3 and replace with the following:
   “Minimum installed thickness: 8-10mm.”

H. On page 8, delete paragraph 3.3.B.5 and replace with the following:
   “Mix and spray apply the fiberglass/Kevlar®-reinforced body coat to all floors, walls and ceilings with a 45:1 air-powered airless spray rig with gravity-fed hopper to completely and evenly wrap all surfaces at a thickness of 25-35 mils and allow to cure. Take special care in small and confined spaces that surface thickness is applied in a consistent manner without variations of more than 2 mils.”

I. On page 8, delete paragraph 3.3.B.6 and replace with the following:
   “Sand all substrates and surfaces smooth to remove any exposed fiberglass and other imperfections, then blend and apply top coat / antimicrobial at 8-10 mils to wall, ceiling, and floor surfaces. While resin is open install PC 339 glass beads and backroll to completely encapsulate beads into epoxy resin to achieve proper anti-slip properties. Walls and ceilings shall be smooth, devoid of all pin holes and texture and be smooth to the touch.”
J. On page 8, delete paragraph 3.3.B.7 and replace with the following:

"Mix and install final finish coat of PC 509 with PC 499 Anti-Microbial additive at 5-6mm WFT."

GENERAL QUESTIONS

ITEM NO. 2 Is it intended that the fire alarm system monitor the “integral factory mounted” smoke detector? Is it intended that the fire alarm system monitor the provided smoke detector and operate the damper, or is it the intent that the smoke detector directly operate the damper? I would think it would be desirable for the fire alarm system to do both functions. In some fashion, we will need an input from the smoke detector to know when to operate the damper. It would be the easiest to control if the fire alarm system monitors the smoke detector and controls the damper. Under this scenario, the smoke detector would NOT be wired into the damper motor, only the fire alarm system would. In fact, if the provided smoke detector was designed for 24 vdc, we could provide the power from the FACP and this would also put those smoke detectors onto the back-up battery power of the fire alarm system.

A. DLR Group Response: Both damper and smoke detectors are going to be provided by Division 23. The smoke detector will directly operate the damper. The Fire Alarm Control Panel will only monitor the smoke detectors and not control the damper.

ITEM NO. 3 Key Note #5, located on every sheet of the architectural drawings, reads, “verify wall extends full height to the deck. If partial-height wall condition exist, provide new wall type 2B to deck per detail 41/A10.01.” There is no way a GWB Subcontractor can take off, quantify, and price this condition prior to the bid. Please provide the locations on the drawings where these conditions exist, which will allow the subcontractors to price it. As time is of the essence, we would suggest having the contractors carry a small allowance for this condition of $15,000 (+ or -) to cover the future costs as it would take someone a great deal of time to walk the project prior to the bid and attempt to find every location. Please clarify how you would like us to handle this condition?

A. DLR Group Response: 
B. This condition is required at locations of the smoke compartment wall indicated with the heavy dashed line. Field surveys were not completed by architect at full extent of walls. Architect did observe variances in the height of the gap from top of wall to deck above of 1"-6".
C. An allowance is acceptable to cover the anticipated costs for locations listed above.
D. Walls over sliding compartment doors are required to be full height per details on sheet A9.07 and will not be included in the allowance.
E. Locations of the smoke compartment wall indicated with a wall type symbol 2 and/or keynote #4 has been confirmed in field observations to not be full height for the extent of the wall from the height of the ceiling to the floor deck above. (An example would be the separation wall between Public Elevator Vestibule 351 and Public Visiting 352.) Provisions for these walls will not be included in the allowance.

ITEM NO. 4 Regarding the new shower fixtures, are the shower fixtures to be surface mounted per the model numbers in the fixture schedule or recessed, front access showers per the written specification?

A. DLR Group Response: Refer to Addendum #2 for plumbing fixture clarification.
ADDITIONAL ATTACHMENTS:

All CSI Substitution request forms submitted in Addenda 1-3 (22 pages total).

Substitution Request review (prebid)

Approval applies to specific product substitution only and does not relieve the Contractor/Supplier from the responsibility of meeting all applicable requirements of the Plans and Specifications. “Yes” indicates that the substitution request is accepted; “No” indicates that it is NOT accepted, and “Pending” indicates that evaluation of the substitution request is pending.

The following representatives and manufacturers have further agreed upon the following:

1. The proposed substitution does not affect dimensions shown on the Drawings.
2. The proposer will pay for changes to the building design, including engineering design, detailing, and construction costs caused by the requested substitution.
3. The proposed substitution will have no adverse effect on other trades, the construction schedule, or specified warranty requirements.
4. Maintenance and service parts will be locally available for the proposed substitution.
5. The proposed substitution function, appearance, and quality are equivalent or superior to the specified item.

PROPOSED SUBSTITUTION: Miljoco SX735

Attached data includes product description, specifications, drawings, photographs, performance and test data adequate for evaluation of request. Applicable data is clearly identified.

Attached data also includes description of changes to Contract Documents the proposed substitution requires for its proper installation.

Undersigned certifies following items, unless modified by attachments, are correct:

1. Proposed substitution does not affect dimensions shown on drawings.
2. Undersigned will pay for changes to building design, including engineering design, detailing, and construction costs caused by proposed substitution.
3. Proposed substitution has no adverse effect on other trades, construction schedule, or specified warranty requirements.
4. Maintenance and service parts are available locally or are readily obtainable for proposed substitution.

Undersigned further certifies the function, appearance, and quality of the proposed substitution are equivalent or superior to the specified item.

Undersigned agrees, if this page is reproduced, the terms and conditions for substitutions found in Bidding Documents apply to this proposed substitution.

CSI Form 13.1A
SUBSTITUTION
REQUEST FOR CAUSE
(Continued)

The Undersigned certifies:

- Proposed substitution has been fully investigated and determined to be equal or superior in all respects to specified product.
- Same warranty will be furnished for proposed substitution as for specified product.
- Same maintenance service and source of replacement parts, as applicable, is available.
- Proposed substitution will have no adverse effect on other trades and will not affect or delay progress schedule.
- Cost data as stated above is complete. Claims for additional costs related to accepted substitution which may subsequently become apparent are to be waived.
- Proposed substitution does not affect dimensions and functional clearances.
- Payment will be made for changes to building design, including A/E design, detailing, and construction costs caused by the substitution.
- Coordination, installation, and changes in the Work as necessary for accepted substitution will be complete in all respects.
