Commissioner Amanda McKinney  
Commissioner Ron Anderson  
Commissioner LaDon Linde

Dear County Commissioners:

I received a call from Brian Griff asking the Fair Association to submit a letter to the County Commissioners providing some project detail for our request to upgrade the existing RV campground facilities at State Fair Park.

On behalf of our Board of Directors, we are requesting that the remaining funds in the Capital Improvement Project along with grant monies received from the Department of Ag, approximately \$2.6 million dollars, be used to upgrade the existing RV campground facilities. Also, upon approval of this request, we ask that the County move forward with contracting with HLA Engineering and Land Survey Inc. to begin the design process for this project so we could potential begin making these upgrades in early 2023.

The RV campground facilities, which includes 180 RV spots needs significant upgrades and replacement to both electrical and water services. Many of the spots are not usable as either the electrical or water service is beyond repair, out of service or pose a safety hazard. We are also requesting that this upgrade include the shower/restroom facilities that support the RV campground and RV dumping station which are not up to standard and in disrepair.

The Board's Long Range Planning Committee, Scott Wagner and Don Whitehouse, or I would be available to attend a Commissioner Study Session or be available by phone if any additional information is needed.

Thank you in advance,

Kathy Kramer, CVE, CFEE and CMP
