Describe Fiscal Impact:

Road Maintenance Budgeted \$500,000 line item 213 Seal Coat program.

Background Information:

BST has been a preventative maintenance technique used by Yakima County and most municipalities as a BMP to mitigate costly repair projects by adding longevity to our investment in paved surfaces. The BST program provides increased texture to the road surface assisting in public safety when slick conditions are present. This increase surface friction assists in reducing accidents when small amounts of frozen precipitation are on the surface. The program reviews all county roads and allocates program miles for the current yr application based on need by review of pavement ratings, traffic Counts, Current Visual Condition, Roughness and History. The program is supported by the CRAB board as a BMP and is recognized as a major portion of our CAPP Program to receive CAPP Funds.

Summary & Recommendation:

Yakima County road maintenance staff and Yakima County Engineer recommend the Board of County Commissioners pass a resolution to authorize "Award bid for the purchase of asphalt emulsion for the Yakima County 2022 Bituminous Surface Treatment Program to Albina Asphalt."
