Permits are required prior to installation of mechanical equipment or appliance whether it is new, replacement, relocated, alteration, or change-out. Other permits may be required depending on the scope of work for your project.

Permits pertaining to Manufactured Homes are under the jurisdiction of Washington State Department of Labor and Industries (509) 454-3760.

Yakima County has adopted the various *International Codes which are updated every three years. (Please contact our office to verify which code cycle is applicable to your project).

*International Building Code (IBC 101.3—Intent) The purpose of the codes are to establish the minimum requirements to provide a reasonable level of safety, public health and general welfare through structural strength, means of egress, facilities, stability, sanitation, adequate light and ventilation, energy conservation, and safety to life and property from fire and other hazards attributed to the built environment and to provide a reasonable level of safety to fire fighters and emergency responders during emergency operations.

To apply for your permit, please provide:

1. General Application for Construction.
2. Floor plan showing room uses, location of mechanical equipment (include plumbing fixtures if applicable).
3. Equipment schedule:
 - How many and what type of equipment will be installed.
 - Power/Fuel source (Electric, *Natural Gas, *LPG Gas).
 - Size of equipment (Specify: horsepower, ton, Btu, cfm)

*LPG gas equipment or appliance may require an additional permit for a propane tank. Before issuance of your mechanical permit, a Fire Code Permit is required for the tank. If you have an existing tank, please provide your permit number to confirm that a permit has been issued and a final approved inspection was completed, otherwise, a new permit for the tank is required. Both permits can be issued simultaneously.

The equipment and appliances shall be installed according to the manufacturer's installation instructions and shall be made available to the inspector at the time of your inspection. For *gas appliances, a pressure test card must be completed and made available to the inspector.

The staff at Yakima County Public Services Building and Fire Safety Division are here to assist you. Please contact our office if you have any questions at (509) 574-2300.

- Project Coordinators can assist you regarding your application submittal.
- Plans Examiner or Building Inspector can assist you with technical questions.
