5-year plan Esther Magasis mentioned updating the 5-year plan now as opposed to waiting until year 2024 will end up having a tangible impact on the programs selected and their goals with the community.
Annette asked if it is a community conversation if suggestions are made to modify goals or strategies?
The goal is for the committee to modify and update goals and send them back to the state. Esther has previously communicated with the General Membership about emailing her for any requests, suggestions, or updates regardless to the 5-year plan. Currently there has not been any additional feedback.
Action item: Esther will invite the committee to take the survey for additional feedback.
