Sunnyside Community Center COVID-19 Testing Site Will be Closed After April 21, 2022

Yakima, WA- The Sunnyside Community Center testing site located at 1521 S 1st St, Sunnyside, WA 98944 will be closed after April 21, 2022. Yakima County continues to report a low number of COVID-19 cases and hospitalizations due to COVID-19. As a result, there has been a decrease in the demand for COVID-19 testing. Although the Sunnyside Community Center testing site will be closed after April 21, 2022, there is still opportunity to get tested at the Yakima Valley College testing site located at 810 S 14th Ave, Yakima, WA 98902. It is open Tuesday-Saturday from 8am-3pm.

Additionally, community members can order free at-home COVID-19 tests from the federal government and Washington State Department of Health. These at-home tests are available every month to households and are a great resource to have available for community members and their families. For more information, individuals can visit www.YakimaTesting.org. As a reminder, if individuals need to report a positive at-home test result, they can call Washington State Department of Health's COVID-19 hotline at 1-800-525-0127.

Quote
"We are grateful for the staff and partners who have provided invaluable access to COVID-19 testing for the community. The University of Washington is committed to partnering with the Yakima Health District to ensure there is adequate testing available throughout Yakima County. We will continue to monitor COVID-19 activity and will work with the University of Washington to open a new site within a week in the lower valley if there is a new surge in COVID-19 cases." -

Nathan Johnson, Local Emergency Response Coordinator, Yakima Health District
