

Grading & Excavation Information Application & Checklist

Form # BFS0050 A
Revised 07/15/2021

Yakima County Public Services ~ Building & Fire Safety Division
128 North 2nd Street, Yakima, WA 98901 ~ Office (509) 574-2300

Building & Fire Safety Division accepts permit applications

Monday through Friday 8:00am – 3:15pm (excluding holidays)

BEFORE YOU BEGIN ANY GRADING OR EXCAVATION WORK **YOUR GRADING PERMIT MUST BE APPROVED AND ISSUED**

This Brochure is relevant to Grading and Excavation Permit requirements. Please review this entire brochure as it pertains to your application, plan submittal, site plan requirements, work that is exempt from a grading permit, when engineering is required, etc.

Purpose: A Grading Permit allows Yakima County to review your project prior to excavation to determine how the proposed activity will impact the environment, structures, or neighboring properties.

A GRADING PERMIT DOES NOT INCLUDE PROJECTS AS DESCRIBED BELOW FOR MINING TYPE OPERATIONS. **PLEASE SEE THE PLANNING DIVISION REGARDING ZONING & LAND USE REGULATIONS.**

(REFERENCE FROM YAKIMA COUNTY CODE TITLE 19 DEFINITIONS)

- ❖ “Mining site/operation” means a tract of land and the operations necessary to excavate, process, stockpile, or remove materials such as sand, gravel, aggregate, rock or other mineral resources. The retail, wholesale, contract purchase, or transfer of mineral products is within the scope of this definition.
- ❖ “Mineral batching” includes the batching of sand and gravel or rock into asphalt or cement concrete.
- ❖ “Mineral processing” means the crushing, non- chemical washing (including sedimentation ponds), screening, sorting, stockpiling and blending of rock, sand, gravel and other earth, natural materials and/or precious metals. Processing does not include batching of sand and gravel or rock into asphaltic or Portland cement concrete products, the manufacturing of products such as concrete pipe, bricks, concrete forms and the like or the chemical blending or extraction of precious or semi- precious minerals.

ADDITIONAL YAKIMA COUNTY DEPARTMENTS, HANDOUTS, AND WEBSITE INFORMATION THAT MAY BE OF ASSISTANCE

Common Grading Terminology:

- **Fill** is a deposit of earth material placed by artificial means (such as a dump truck or a backhoe). Only natural materials such as rock, gravel and dirt may be used for fill.

Fill that is NOT allowed:

- ◆ **Asphalt.**
 - ◆ **Concrete larger than 12" in size.**
 - ◆ **Tree stumps and other debris.**
- **Cuts** are the removal of any and materials on the land by artificial means to lower any portion of the land.
 - **Redistribution** means the moving of any and all materials within the property boundaries to alter (cut or fill) the elevations on any portion of the land.
 - **Volume of materials is based on the total sum of cubic yards of ALL CUTS and FILL of excavated materials.**

EXEMPTIONS : Ordinance 4-2021 Adopted May 4, 2021

A grading permit is not required for the following activities shown below:

Exemption from the permit requirements of this appendix shall not be deemed to grant authorization for any work to be done in any manner in violation of the provisions of this code or any other laws or ordinances of this jurisdiction.

13.05.160 Amendment to Appendix Chapter J, Grading, Section J103.2 Exemptions. Section J103.2 of Appendix Chapter J of the International Building Code, 2018 Edition, is hereby amended as follows:

J103.2 Exemptions. A grading permit is not required for the following:

1. When approved by the Building Official, grading in an isolated, self-contained area if there is no danger to the public, and that such grading will not adversely affect adjoining properties.
(A grading application is required).
2. An excavation below finished grade for basements and footings of a building, retaining wall or other structure permitted under this code. This shall not exempt any fill made with the material from such excavation or exempt any excavation having an unsupported height greater than 5 feet (1524 mm) after the completion of such structure.
3. Cemetery graves.
4. Refuse disposal sites permitted by other regulations.
5. Excavations for wells, tunnels, or trenches for utilities.
6. Mining, quarrying, excavating, processing, or stockpiling of rock, sand, gravel, aggregate or clay controlled by other regulations, provided such operations do not affect the lateral support or increase the stresses in or pressure upon any adjacent property.
7. Exploratory excavations under the direction of registered design professional.
8. An excavation which (1) is less than 3 feet (915 mm) in depth, or (2) which does not create a cut slope greater than 6 feet (1829 mm) in height and steeper than 1 unit vertical in 1 1/2 units horizontal (66.7% slope).
9. A fill less than 2 foot (610 mm) in depth and placed on natural terrain with a slope flatter than 1 unit vertical in 5 units horizontal (20% slope), or less than 4 feet (1219 mm) in depth, not intended to support structures, which does not exceed 100 cubic yards (76.6 m³) on any one lot and does not obstruct or divert a drainage channel.
10. Test holes done under the provisions of an on-site sewage disposal permit application.
11. Grading, including roads, bridges and municipal construction, which is designed to Washington State Department of Transportation (WSDOT), American Public Works Association (APWA) or Federal Highway Administration (FHWA) standards and specification where such grading is subject to review and approval of a local government agency or a state or federal agency.
12. When approved by the Building Official, temporary grading work necessary to protect property.
13. Grading work which:
 - a. Is not intended to support structures, and
 - b. Is not subject to permitting requirements of other regulations.

GRADING & EXCAVATION SITE PLAN REQUIREMENTS

Plans shall be drawn to scale upon suitable material. Plans shall be of sufficient clarity to indicate the nature and extent of the proposed work and show in detail that they will conform to the provisions of the code and all relevant laws, ordinances, rules and regulations.

PLEASE NOTE: AERIAL PHOTOS MAY BE SUBMITTED, HOWEVER ARE NOT ACCEPTABLE IN LIEU OF A SITE PLAN.
Aerial photos do not copy well to distribute to other departments and agencies.

- Site plan shall be submitted on a minimum 8½" x 11" size paper. If a larger size site plan is used, please submit a reduced copy on a maximum 11" x 17".
- Use a standard scale (i.e.: ¼", ½") and indicate which scale was used on the site plan (i.e.: ¼" = 20').
- Size of the drawing needs to be sufficient to the level of detail required to meet all applicable codes and laws relevant to the work being described.

1. **The first sheet of each set of plans shall have:**

- a. Name and address of the owner and the person by whom they were prepared.
 - b. The location of the work.
 - c. General vicinity of the proposed site.
2. Property lines and accurate contours of existing ground and details of terrain and area drainage.
 3. Limiting dimensions elevations or finish contours to be achieved by the grading and proposed drainage channels and related construction.
 4. Detailed plans of all surface and subsurface drainage devises, walls, cribbing, dams and other protective devices to be constructed with, or as part of, the proposed work together with a

map showing the drainage area and the estimated runoff of the area served by any drains.

5. Location of any buildings or structures on the property where the work is to be performed.
6. Provide the location of any buildings or structures on adjacent parcels which are within 200 feet of the property or which may be affected by the proposed grading operations.
7. Recommendations included in the soils engineering report and the engineering geology report shall be incorporated in the grading plans or specifications. When approved by the Building Official, specific recommendations contained in the soils report and the engineering geology reports, which are applicable to grading, may be included by reference.
8. The dates of the soils engineering and engineering geology reports together with the names, addresses and phone numbers of the firms or individuals who prepared the reports.
9. Show calculations of maximum cuts/fills.
10. Detail descriptions of fill materials to be used or destination of materials to be removed.
